

DAILY MOBILITY ROUTINE

A daily mobility routine you can finish in **under 10 minutes**. Do it **in the morning** — and if not in the morning, definitely **before you train**. Working through full joint range of motion every day improves overall flexibility and strength. These movements are a core pillar of pre-habilitation: the work you do now so you're not doing rehab later.

< 10 MIN

TOTAL TIME

Phone timer on for the 30-second holds and it paces itself.

AM

MORNING, OR PRE-TRAINING

First thing is best. If not, before you touch a ball.

16

MOVEMENTS, IN ORDER

Top to bottom — it's sequenced to warm you up as you go.

DAILY

EVERY DAY, NO KIT

Miss a day? Just pick it up tomorrow. Don't double up.

SLOW

CONTROL OVER SPEED

Slow and full range beats fast and half-arsed, every time.

R / L

BOTH SIDES

Do the reps on the right, then the same on the left.

CARs

CONTROLLED ARTICULAR ROTATIONS

Big, slow circles through the joint's full range. Nothing else moves.

NO PAIN

STIFF IS FINE, SHARP ISN'T

Work to the edge of stiffness. Back off anything that bites.

THE ROUTINE — TOP TO BOTTOM

Cues are a starting point, not gospel — Rob will walk the group through each one at the first preseason session.

- 01 **Pogo jumps** 30 SEC
Feet together, knees soft, bounce off the balls of your feet. Quick, light, springy — think skipping rope without the rope.
- 02 **Bouncing body twists** 30 SEC
Keep the light bounce going and swing your arms loosely side to side, letting your torso rotate with them.
- 03 **Body waves** 30 SEC
Stand tall, then roll a wave down through your chest, hips and knees, and back up. Loose spine, smooth rhythm.
- 04 **Elephant walks** R / L × 5
Hands on the floor, hips high. Alternate pressing one heel down while the other knee bends — “walking” the hamstrings.
- 05 **Squat holds** 30 SEC
Sit into your deepest comfortable squat, heels down, chest up. Use elbows inside the knees to gently open the hips.
- 06 **Squatting thoracic rotations** R / L × 5
From the squat, plant one hand and reach the other up to the ceiling, following it with your eyes. Swap sides.
- 07 **Cossack squats** R / L × 5
Wide stance. Sit down over one leg, keeping the other leg straight with toes up. Shift across to the other side.
- 08 **Pancake fold** 30 SEC
Seated, legs wide. Hinge at the hips and walk your hands forward, keeping the back long. Breathe into it.
- 09 **World's greatest stretch** R / L × 5
Deep lunge, back knee off the floor. Drop the inside elbow toward the front foot, then rotate that arm to the sky.
- 10 **Cat cow** × 10
On all fours. Arch the back and look up (cow), then round the spine and tuck the chin (cat). Slow, one breath each.
- 11 **Hip CARs** R / L × 5
On all fours or standing. Draw the biggest, slowest circle you can with one knee — forward, out, back — without moving your trunk.
- 12 **Needle threads** R / L × 5
On all fours. Slide one arm under the other, dropping the shoulder toward the floor, then reach it up and open. Swap.
- 13 **90/90** R / L × 5
Seated, front shin and back shin both at 90°. Sit tall, then switch the legs across to the other side without using your hands.
- 14 **90/90 folds** R / L × 5
In the 90/90 position, hinge forward over the front shin with a flat back. Hold a breath, come back up.
- 15 **Shoulder CARs** × 5
Stand tall, arm straight. Trace the biggest slow circle you can — forward, up, back and around — keeping the ribs down.
- 16 **Trunk twists** R / L × 5
Feet planted, arms out or across the chest. Rotate the upper body fully to one side, then the other, hips facing forward.
